SR1 Series INSTRUCTION MANUAL

TCD210090AB

Autonics

Thank you for choosing our Autonics product.

Read and understand the instruction manual and manual thoroughly before using the product.

For your safety, read and follow the below safety considerations before using. For your safety, read and follow the considerations written in the instruction manual, other manuals and Autonics website.

Keep this instruction manual in a place where you can find easily. The specifications, dimensions, etc. are subject to change without notice for product improvement. Some models may be discontinued without notice. Follow Autonics website for the latest information.

Safety Considerations

• Observe all 'Safety Considerations' for safe and proper operation to avoid hazards. • Λ symbol indicates caution due to special circumstances in which hazards may occur.

Warning Failure to follow instructions may result in serious injury or death.

- 01. Fail-safe device must be installed when using the unit with machinery that may cause serious injury or substantial economic loss.(e.g., nuclear power control, medical equipment, ships, vehicles, railways, aircraft, combustion apparatus, safety equipment, crime/disaster prevention devices, etc.) ailure to follow this instruction may result in personal injury, economic loss or fire.
- 02. Do not use the unit in the place where flammable/explosive/corrosive gas, high humidity, direct sunlight, radiant heat, vibration, impact or salinity may be present.
- ailure to follow this instruction may result in explosion or fire. 03. Install on a device panel to use.
- ailure to follow this instruction may result in fire or electric shock 04. Do not connect, repair, or inspect the unit while connected to a power source.
- Failure to follow this instruction may result in fire or electric shock. 05. Check 'Connections' before wiring.
- Failure to follow this instruction may result in fire. 06. Do not disassemble or modify the unit.

Failure to follow this instruction may result in fire or electric shock.

Caution Failure to follow instructions may result in injury or product damage.

01. Use the unit within the rated specifications.

- ailure to follow this instruction may result in fire or product damage 02. Use a dry cloth to clean the unit, and do not use water or organic solvent.
- ailure to follow this instruction may result in fire or electric shock 03. Keep the product away from metal chip, dust, and wire residue which flow into the unit.
- Failure to follow this instruction may result in fire or product damage 04. Since leakage current still flows right after turning off the power or in the output OFF status, do not touch the load terminal. Failure to follow this instruction may result in electric shock

Cautions during Use

- Follow instructions in 'Cautions during Use'.
- Otherwise, it may cause unexpected accidents.
- 4 30 VDC --- model power supply should be insulated and limited voltage/current or
- Class 2, SELV power supply device. Attach a heat sink or install the unit in the well ventilated place.
- To attach the heat sink, use Thermal Grease as below or that of equal specification.
- Thermal Grease : GE TOSHIBA (YG6111), KANTO-KASEI (FLOIL G-600), SHINETSU (G746)
- Ground to the panel. Failure to follow this instruction may result in electric shock.
 While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in burn

due to high temperature of the surface. In order to protect the product from the short-circuit current of the load, use rapid

- fuse of which I²t is under the 1/2 of SSR I²t. When short-circuited, replace the fuse to those of same specification with the used rapid fuse. Install dummy resistance in parallel with the load, to keep the sum of current flowing
- in the load and dummy resistance being over SSR minimum load current.
- When using random turn-on model for phase control, install noise filter between the load and the power of the load.
- Do not use near the equipment which generates strong magnetic force or high frequency noise.
- This unit may be used in the following environments.
- Indoors (in the environment condition rated in 'Specifications')
- Altitude max. 2.000 m
- Pollution degree 2
- Installation category III

Ordering Information

This is only for reference, the actual product does not support all combinations. For selecting the specified model, follow the Autonics website.

Function

R: Random turn-on

Number: Rated load current (unit: A)

No-mark: Zero cross turn-on

Instruction manual

SR1	-	0	0	3	4	-	Ν	
Rated input voltage					8	Rate	d load cur	rent

Rated input voltage 1:4-30 VDC== 4.90 - 240 VAC~

- Rated load voltage
- 2:24 240 VAC~ 4:48-480 VAC~

Product Components

Dimensions

Product

• Unit: mm, For the detailed drawings, follow the Autonics website.

• When installing to the panel, tightening the screw with a torque of 1.8 to 2.5 N m.

Cautions during Installation

• When installing multiple SSRs, be sure to keep space between SSRs for heat radiation. • When installing SSRs horizontally (input part and output part on the same height), be sure to supply less than 50 % of the rated load current.

Cautions for Wiring

Unit: mm, When connecting the wire to the terminal, use the round crimp terminal.

Specifications

Input

Rated input vo	ltage range	4 - 30 VDC==	90 - 240 VACrms \sim (50 / 60 Hz)			
Allowable input voltage range		4 - 32 VDC==	85 - 264 VACrms~ (50 / 60 Hz)			
Max. input current		18 mA	18 mArms (240 VACrms~)			
Operating voltage		\geq 4 VDC==	≥ 85 VACrms~			
Releasing voltage		\leq 1 VDC==	\leq 10 VACrms \sim			
Oporato timo	Zero cross turn-on	\leq 0.5 cycle of load power + 1 ms	≤ 2 cycle of load power + 1 ms			
Operate time	Random turn-on	\leq 1 ms	-			
Release time		\leq 0.5 cycle of load power + 1 ms	≤ 2 cycle of load power + 1 ms			

Output

.

General sp	ecifications
------------	--------------

Dielectric strength (Vrms)	Between the charging part and the case : 2500 VAC $\sim 50/60$ Hz for 1 min
Insulation resistance	Input-output, input / output-case : $\geq 100 \text{ M}\Omega \text{ (500 VDC} = \text{megger)}$
Indicator	Input indicator (green)
Vibration	0.75 mm double amplitude at frequency of 10 to 55 Hz in each X, Y, Z direction for 1 hour
Vibration (malfunction)	0.5 mm double amplitude at frequency of 10 to 55 Hz in each X, Y, Z direction for 10 min
Shock	300 m/s ² (≈ 30 G) in each X, Y, Z direction for 3 times
Shock (malfunction)	100 m/s ² (≈ 10 G) in each X, Y, Z direction for 3 times
Ambient temperature ⁰¹⁾	-30 to 80 °C (in case of the rated input voltage 90 - 240 VAC~: -20 to 70 °C), storage: -30 to 100 °C (no freezing or condensation)
Ambient humidity	45 to 85 %RH, storage: 45 to 85 %RH (no freezing or condensation)
Input terminal connection	\geq 1×0.5 mm ² (1×AWG 20), \leq 1×1.5 mm ² (1×AWG 16) or \leq 2×1.5 mm ² (2×AWG 16)
Output terminal connection ⁰²⁾	$ \geq 1 \times 1.5 \text{ mm}^2 (1 \times \text{AWG 16}), \\ \leq 1 \times 16 \text{ mm}^2 (1 \times \text{AWG 6}) \text{ or } \leq 2 \times 6 \text{ mm}^2 (2 \times \text{AWG 10}) $
Input terminal fixed torque	0.75 to 0.95 N m
Output terminal fixed torque	1.6 to 2.2 N m
Approval	CCER Sum EHI
Weight (packaged)	≈ 73 g (≈ 111g)
01) See the 'SSP Derating Cupie' because	the capacity of the rated load current is differ depending on the ambient

02) Connect the wire met the capacity of the load current to the output terminal.
